

Final reflections

This was a lot of work. One of the biggest hurdles was licensing as my personal subscription could not use the Face API due to restrictions placed on many personal subscriptions.

There were also issues getting the Digital ID's to match, created normalization procedures to compensate. The Digital ID for ca-dl-avkash-chauhan.png had two last names "AVKASH CHAUHAN" and the Digital ID ca-dl-radha-s-kumar.png also had two last name "S Kumar".
